Technical Support should be provided by a person trained on the GMA Sound and lighting system. A complete list is available through the Venue Manager. However, we highly recommend any of the three companies below for all of your technical needs. You will need to contract and pay them directly.

If you would like to have someone from your organization trained on the GMA Sound System, please let the Venue Manager know and contact Danny Beaver (903-821-5656 or e-mail danny@dudesmusic.com) and he can provide training for a fee of \$200 payable directly to him.

Once you have locked in your rental date, you should confirm your technical support. Each company can work up a customized estimate for you to review.
